DETAILED ACTION

Allowable Subject Matter

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. MANGANO 6,798,797 discloses method and apparatus for driving laser diode sources, teaches excessive drive current causes laser diode failures and to avoid excessive current is complicated by the fact that laser diode junctions are highly non-linear (col. 1, lines 42+).

Claims 1-12 allowed.

The following is an examiner's statement of reasons for allowance: the prior art does not disclose or suggest a laser diode driving system having the switch configuration as claimed for coupling the drive voltage to the laser diode.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
